**Naturalness**

# PERSIPHEN

**Antioxidant protection of the organism**

*It effectively protects the body from free radicals, thereby preventing the development of a large number of pathological processes.*

High vitality and strong immunity

Protection against negative environmental factors

Enhancement of body adaptive capabilities

**Prunus persica pericarp** is a natural complex, which has a high ability to block free radicals. It includes a unique set of polyphenolic compounds, those play an important role in extracellular and intracellular antioxidant protection of body.

**Vitamin C** enhances the protective functions of body, preventing viral and bacterial infections, it has antioxidant and anti-inflammatory effects and performs vasoconstrictive effect.

**Vitamin E** is a strong antioxidant, it not only prevents oxidative stress, but successfully fights with its consequences. It restores the collagen destroyed by free radicals, takes part in the formation of intercellular substances, inhibits the aging process and improves cellular nourishing. Moreover, it slows down the aging process and helps prevent cancer, diabetes and heart diseases.

**Beta-Carotene** is called by scientists as the most suitable form of carotene for human body, because it can more quickly and fully be transformed in the organism into vitamin A. The antioxidant properties of beta-carotene help the body to get rid of many harmful for health factors, like free radicals, radionuclides, heavy metal salts and so on. In addition to that, mentioned substance improves the functions of immunity system, enhances adaptogenic capabilities of body and relieves stress.

**Curcuma longa rhizome** has antioxidant effect, slows down the aging process, supports liver functions, has an anti-inflammatory and antimicrobial effects, and reduces the risk of oncological diseases.

Taking Persiphen bioactive complex provides a safe protection against destroying effect of free radicals and also has a positive impact on the body general tone.
