

## CALCIUMMEG

The unique formulation on the basis of the best form of calcium in terms of bioavailability

Calcium plays an important role in the body vital activities, it is especially essential for the formation of teeth, bones, prevention of structural changes in bone tissue, and also for the maintenance of health state of skin, hair and nails.

AND JOINT HEALTH

PROPHYLAXIS OF BONE AND JOINT ISSUES

Omega-3 fish oil:- Fish oils are a good source of omega-3 fatty acids, which can help with memory, heart health and so much more, The omega-3 fatty acid DHA is essential for optimal bone health. A number of studies suggest that fish oil (EPA and DHA) supplementation inhibits bone break down, increases absorbed from the diet and enhances calcium in bone.

Calcium carbonate:- Calcium carbonate used when the amount of calcium taken in the diet is not enough. Calcium is needed by the body for healthy bones, muscles, nervous system, and heart. Calcium carbonate also is used as an antacid to relieve heartburn, acid indigestion, and upset stomach.

Boron: takes part in the metabolism of fats, hydrocarbons, a number of hormones and vitamins, it is also involved in the metabolism of bone tissue. Boron helps vitamin D to transform into the more active form of itself, thereby increases calcium absorption and its level in bones.

**Vitamin C**:- restores connective tissues structure and strengthens collagen fibers.

**Vitamin D3**: is responsible for digestion of magnesium and calcium, those are essential for the formation of teeth and bone tissues, it has a positive impact on the restoration processes and growth of cells. It also protects body from the development of cancers.

**Vitamin K2**:- is related to the fat-soluble vitamins. This is known as a vitamin, which plays an important role in blood clotting process. Moreover, vitamin K also is essential to maintain strong bones, prevents heart diseases and also a number of physical processes in body.
