VESSELS

PROVIDES NUTRITION
IN ATHEROSCLEROSIS

INCREASES BODY
ENERGY RESERVE

NOVOMEGIN IS A SOURCE OF
POLYUNSATURATED FATTY ACIDS,
DEFICIENCY OF WHICH CAN
ADVERSELY AFFECT HEALTH STATUS.

POLYUNSATURATED FATTY ACIDS help to maintain a healthy cholesterol level, blood circulation and natural anti-inflammatory mechanisms of the body. **NOVOMEGIN** bioactive complex's formulation is strengthened with quercetin and lipoic acid.

QUERCETIN enhances the anti-inflammatory effect of polyunsaturated fatty acids, reduces the vascular walls permeability and fragility, leading to increase in elastic and rheological properties; improves blood circulation, activates nutrition supply to the organs and tissues. Having antioxidant effect and action, it helps bind free radicals, inhibits lipid peroxidation processes and hampers the development of allergic reactions.

LIPOIC ACID has an antioxidant action, due to the groups, which contain sulfur. These groups are able to bind heavy metals and activate cell respiration. It is the basis of cell life cycle and body in general.

RECOMMENDED USAGE:

1 capsule 1 time a day with meal or as suggested by the healthcare professional.
These products are not intended to diagnose, treat, cure or prevent any diseases.

NOT FOR MEDICINAL USE.

Nutraceutical is not to be used as substitute for a varied diet.
Please Do not exceed the Recommended daily usage.
