# ANTIPURINE

Nutraceuticals complex for the correction of purine metabolism and reduction of uric acid levels in the blood

Reducing uric acid production

Removing uric acid from the body

Suppress inflammation

**Salix alba** Linn. (white willow) Bark- Widely used for chronic diseases of the joints.

- ✓ Helps reduce the level of uric acid in human blood.
- ✓ Used in the treatment and prevention of gout.
- ✓ It reduces the risk of internal blood clotting in vessels.
- ✓ Willow bark, with its anti-inflammatory action, can potentially reduce the pain and discomfort caused during arthritis and other conditions.

**Peptide** complex “Hydrolysed Whey Peptide- The product is a peptide complex of milk proteins produced By Artlife LLC with confirmed safety, Biotech complex using enzymatic hydrolysis technology and has the following advantages:

- ✓ Protection and restoration of the body by reducing inflammatory processes.
- ✓ High safety profile, no restrictions on duration of use Peptide regulation – a gentle effect using natural mechanisms.

**Boswellia** extract- Boswellia resin has been used in traditional medicine to treat inflammatory diseases. The pharmacological potential of the resin has been scientifically evaluated for arthritis, asthma, colitis, and many other inflammatory conditions.

**Antipurine** selectively removes excess uric acid through the intestines, ensuring its normal pool in the blood and has anti-inflammatory, antirheumatic, analgesic, diuretic, antimicrobial and antiarthritic effects Antipurine can be used for hyperuricemia, gout, and chronic diseases of the joints of a degenerative-dystrophic nature.
