strengthening
immunity

Improves digestion
process

protecting from
viruses

The product is an immunomodulator, the action is aimed at increasing immunity and protecting the human body from pathogenic microorganisms and viruses. Especially during epidemics or seasonal surges in the incidence of respiratory diseases. It is also necessary for people with reduced immunity resulting from long-term illness, stress, fatigue, and exposure to other negative factors.

Shiitake mushroom extract

Shiitake mushroom (*Lentinus edodes*) is a type of edible fungus. It's containing a chemical called lentinan.

Lentinan and other chemicals in shiitake mushrooms might stimulate the immune system. shiitake mushrooms are high in dietary fiber, B vitamins (especially pantothenic acid), copper, selenium, manganese, and iron.

People use shiitake mushroom for HIV/AIDS, common cold, flu, Cancer, and many other conditions. Have sufficient quantity of proteins provide protection against viruses.

Hydrolysed Whey Peptide

these are products of dissection of probiotic bacterial cells into fragments, which include fragments of the bacterial cell wall and their intracellular contents. Despite the proven health benefits of probiotics, metabiotic in the form of Hydrolysed Whey Peptide have a number of advantages:

- ✓ do not get destroyed in the stomach and reach the intestine, act quickly;
- ✓ improving the absorption of calcium from the gastrointestinal tract;
- ✓ decrease in body mass index and percentage of body fat;
- ✓ hypolipidemic potential (reduces the level of total cholesterol, LDL and triglycerides);
- ✓ antioxidant activity;
- ✓ kidney and liver support;
- ✓ immunomodulation through the release of certain inflammatory mediators;
- ✓ prebiotic activity.
