For skin, hair  
and nails

For the beauty  
of body

Anti-Aging  
effect

## Bamboo Extract

- ✓ It helps maintain elasticity and provides strength to the skin.
- ✓ Helps in managing acne, skin eruptions and wounds due to its anti-inflammatory and anti-bacterial properties.
- ✓ Contains antioxidant and anti-irritant qualities, which help in promoting hair growth.

## Hyaluronic acid

- ✓ Hyaluronic acid is a carbohydrate. As we age, our bodies produce less hyaluronic acid, leading to wrinkles, fine lines, and dryness. This is why Hyaluronic Acid Treatments can help us regain elasticity in our skin.
- ✓ This helps to keep the skin hydrated and plump.
- ✓ Hyaluronic acid can help to boost collagen production in the skin, leading to firmer, more youthful-looking skin.
- ✓ Hyaluronic acid is not only hydrating to the skin but it can also be extremely hydrating to the hair. It can help retain hair moisture as a humectant and keep your dehydrated hair deeply nourished.

## Methyl sulfonyl methane

- ✓ Methyl sulfonyl methane improves strength of hair and nails and smoothes and softens skin. It is also called “nature’s beauty mineral” because it supports the production of collagen and elastin.
- ✓ MSM also helps reduce inflammation, which can damage skin cells and cause signs of premature aging like wrinkles.
- ✓ MSM aids in the production of collagen and keratin, two proteins that are vital for hair growth.

## Hydrolysed Whey Peptide

- ✓ Peptides made from deposited bacterial strains from the collection of microorganisms of Artlife LLC with confirmed safety.
- ✓ It has been established that lysates of probiotic bacteria, namely membrane fractions and muramyl dipeptide fragments of cell walls, have a high immunomodulatory effect, activate both types of immune response (humoral and cellular immunity). They also help maintain healthy.

## NOT FOR MEDICINAL USE

These products are not intended to diagnose, treat, or cure any disease.
